

MERLIN MARTINEZ

Woburn, MA 01801 • (386) 601-4371 • merlin20003@outlook.com • linkedin.com/in/merlinmtech • github.com/merlin761

IT Specialist | Jr. Security Operations Analyst | Python Automation | System Administrator | Network Administrator

Technical professional with a Computer Science background and six years of experience across IT, customer service, and security operations. Specialize in building automated Python-based workflows that eliminate repetitive manual tasks and improve system efficiency, delivering secure, scalable code that enables teams to prioritize active defense and continuous monitoring.

EDUCATION

Southern New Hampshire University

2025

B.S., Computer Science (Software Engineering Concentration) | Dean's List, President's List

Relevant Coursework: Development Lifecycle Automation QA, Secure Coding, Software Security, DevSecOps

CERTIFICATIONS

CompTIA Security+ | CompTIA Network+ | CompTIA CySA+ | CompTIA A+ | Splunk certified user

TECHNICAL SKILLS

Platforms & Systems: Windows, Linux, macOS, Active Directory, VirtualBox

Frameworks: MITRE ATT&CK, OWASP Top 10, NIST, CIS, FISMA, FERPA, HIPAA

Security Tools: SentinelOne, Splunk, Wireshark, Nmap, Ticketing Systems

Skills: Python, API Integrations, CI/CD, Automated Workflows, Hardware/Software Troubleshooting, Bilingual (English & Spanish)

PROFESSIONAL EXPERIENCE

CyberTrust, Boston, MA

03/2026 – Present

SOC Analyst Intern

- Triage and escalate IT security issues through detailed support tickets, troubleshooting endpoint capacity warnings, resolving password lockouts, and investigating suspicious logins to ensure continuous availability and prevent unauthorized access.
- Monitor over 1,000 endpoints and escalate verified threats via client ticketing systems and email, enforcing security standards and preventing data breaches for Massachusetts municipalities and non-profit organizations.
- Develop Python scripts using SentinelOne's Management API to automate collection and aggregation of threat detection and vulnerability data, reducing Quarterly Business Review prep time by over 80% (2 hours to 20 minutes per client).
- Hardened internal tooling by replacing plaintext API key storage with an encrypted, OS-native credential vault and integrating Microsoft Azure 2FA via custom Python to enforce NIST, CIS, and FISMA standards.

Per Scholas, Boston, MA

07/2025 – 09/2025

Cybersecurity Training Program

- Configured and secured LAN infrastructure including switch configuration, VLAN segmentation, DHCP/DNS setup, and basic routing to isolate sensitive traffic and reduce the attack surface.

SITEL (Express Scripts), Deltona, FL

10/2021 – 04/2023

Customer Professional Associate 2

- Resolved 90+ daily inbound Level 2 support contacts regarding pharmacy benefits and user access in a high-volume call center, achieving a 99% first-call resolution rate.
- Diagnosed technical issues such as account setups and password resets, minimizing tier-two escalations and streamlining the support workflow.
- Documented all interactions within internal ticketing systems, accelerating turnaround times and ensuring strict adherence to HIPAA compliance standards.

ACADEMIC PROJECTS

Pace Secure Development Policy | C/C++ Secure Coding Standards | github.com/merlin761/cs405

- Authored a detailed breakdown of C/C++ secure coding standards including authentication, encryption, and auditing principles, clarifying the hierarchy of policies and guidelines for software development security.
